Respect For The Law

Views entertained by people with respect to the majesty of the law seem to be divided into two main classes—those who regard the laws of their country as having been enacted primarily for the protection of the rights and liberties of the people, and, in the second group, those who act as if they considered all laws an infringement upon their rights and a denial of liberty to which they feel themselves entitled.

Speaking in a large and general sense, the former view is entertained and upheld in Great Britain, while the second view apparently animates a very large percentage of the people of the United States. Public conception of the functions of the law in Canada is divided between these two groups. Canada's judicial system, its code of laws, and its ideals and methods of law enforcement, are based on the laws of England, and have come down to us through the centuries, with precedent built upon precedent. But, on the other hand, living next door to the big republic, and with a daily intercourse which is not possible to the same extent with Great Britain, our people are naturally and innately influenced and affected by the prevailing trend of thought across the line.

Public concepts of the functions of law are the foundations upon which a nation is reared. It is, therefore, of vital importance that those concepts be sound and firmly established in the minds and ideals of the people. Throughout the United States today no one thing is causing public men, and the more seriously minded portion of the people, greater concern than the breaking-down of law in that country. Apart from the disastrous effect on the morale of the people, it is costing them in dollars and cents more than all the taxation imposed by governments, both Federal and State.

The trouble with the United States is that people have developed the belief, and the younger generation is growing up in that belief, that they can defy the law with impunity and get away with it; that laws are not designed for their protection, but quite the reverse; that courts and policemen are their enemies, not their friends and guardians of their rights and liberties.

Children hear the threat: "The cop will get you if you don't watch out," and even when engaged in innocent play the cry is raised: "Here comes a cop, he's beat it." And they beat it, only to return when the policeman has passed by.

In England, and largely so in Canada, an entirely different atmosphere, a different conception prevails. A policeman is not an enemy, but a friend, one to whom you can appeal when in trouble or difficulty.

We must, for our own good, maintain this attitude, and because of our proximity to the United States, and the constant intercourse between these two countries, it is essential that in our homes and schools the true conception and meaning of "the law," and the officers of the law, should be constantly taught and stressed. All law, in the beginning of law enactments, had but one object, the protection of the rights and liberties of individuals and communities against those who would deny those rights, usurp our liberties, and defraud us of our property.

Law is the reverse of lawlessness. It is orderly government as contrasted with mob-rule. It is the only safeguard against anarchy. Therefore, "the law" is something to be held sacred, to be upheld, to rejoice in; not to be regarded as something irksome, an evil, necessary perhaps for some, but to be flouted if one so desires. Laws should not be regarded solely or merely as prohibitions, restraints upon one's conduct. In their essence they are not prohibitions, but rules of conduct, guides to follow, measures of protection.

In the final analysis, law is but the view of a majority of the people as to what they consider is in their own best interests. It is the people as they formally expressed will. That being the case they should respect and abide by it. A minority opposed to any given law should nevertheless respect and obey it as the will of the majority, just as they expect and insist that others shall respect and obey laws of which they approve, but which some of those others, who may constitute a minority in opposition to themselves, consider unnecessary.

Disregard of law will undermine the home, the nation, and ultimately rob the individual of his own freedom and liberty of action.

More Eggs Produced

During the ten years since egg laying contests have been conducted by the experimental farms branch of the Federal Department of Agriculture a steady increase in the volume of egg production is noted. In 1929 the average of 5,256 birds trapped in these contests was 176.5 eggs per bird, an increase of fifty-four eggs per bird over 1919.

Tree Inspections

The inspectors of tree plantations sent out from the Dominion Forest Nursery Station, maintained by the Forest Service Department of the Interior, at Indian Head, Saskatchewan, had 13,305 inspections during the 1929 season.

The poorest marksmen may accidentally hit the target.

GAS

relieved

WHAT most people call indigestion is usually excess acid in the stomach. Food has soured. The instant remedy is an alkali which neutralizes acids. But don't use crude helps. Use what your doctor would advise.

The best help is Phillips' Milk of Magnesia. For the 50 years since its invention, it has remained standard with physicians. You will find nothing else so quick in its effect, so harmless, so efficient.

One tasteless spoonful in water (Made in Canada)

neutralizes many times its volume in acid. The results are immediate with no harmful after-effects.

Once you learn this perfect way you'll never deal in any other manner with the headaches, gas, bloating, nausea, dizziness, indigestion, biliousness, etc., due to an over-acid stomach and bowels.

Be sure to get genuine Phillips'. It is always a liquid; never made in tablet form. Look for the name Phillips on the bottle. All drug stores sell it—50c.

Canada's Fine Record

People Have Adequate Protection Through Solvency Of Banks
 In the last thirty-seven years Canada has had 12 chartered bank failures whose total liabilities amounted to \$72,785,000. In the same period 8,476 United States banks have failed with liabilities of no less than \$3,754,370,000. On a strictly comparative basis, and after adjustment for the difference in population. This means that liabilities of U.S. banks which have failed have been four times those of Canadian banks.

According to official decennial census figures over the past forty years, average population of the United States during this period has been approximately 124% times greater than that of Canada. Thus a simple multiplication of the liabilities of Canadian banks which failed in the 37 year period, by 124%, indicates that if Canada had had the same population as the United States during this period the liabilities of failed banks would be approximately \$900,000,000, or less than one-quarter of the liabilities which have been rolled up under the United States banking system since 1893.—Financial Post.

Alberta Oil

Production Last Year Close To One and One-Half Million Barrels

Alberta produced close to one and one-half million barrels of oil in 1930, comparative figures from the provincial department of mines reveals. The total 1930 output was 1,433,844 barrels which compares with 999,152 in 1929, an indication that Alberta's oil bubble is steadily expanding. Naphtha, from Turner Valley line-shore, was the leading product with a total of 1,314,039 barrels. Light and heavy crudes accounted for the balance.

Wonderful For Indigestion!

When your stomach acts bad; when Gas, Sourness, Nausea or after-eating discomforts, trouble you, a small dose of pure Bismuth Magnesia will bring relief. For indigestion, the prompt effectiveness of BISMUTH MAGNESIA is wonderful. Even the most obstinate cases quickly respond to its quick, inexpensive use. Ask your druggist.

Ayrshire Breeders

Association Received 76 Reports In January Of Cows That Qualified In The R.O.P.

The Canadian Ayrshire Breeders' Association reports that during the period from January 1st to 26th it received 76 reports of cows and heifers that had qualified in the R.O.P.—37 in the 365 day division and 39 in the honor roll or 305 day division. In the first classification 1 qualified in the mature class; 4 in the four year old; 7 in the three year old, and 15 in the two year old class. Thirty of these records were made on two milkings a day.

Internal parasites in the shape of worms in the stomach and bowels of children sap their vitality and retard physical development. By keeping the child in a constant state of unrest and, if not attended to, endanger life. The child can be spared much suffering and the mother much anxiety by using a reliable worm remedy, such as Miller's Worm Powders, which are sure death to worms.

Roar Of Niagara "Photographed"

Catastrophes Has Low Bass Voice According To Scientists

The Niagara Falls cataclysm has a bass voice, a low bass, far probably below the dull monotone of London, England.

Such was the conviction expressed by Dr. William Braid White, of Chicago, an acoustical expert, after he and Rev. John P. Delaney, physics professor of Canisius College, had photographed the sound waves of the cataclysm. The films were developed by Dr. White when he returned to Chicago. His observations, he explained, were from snap judgment.

"London traffic produced what we believed was the lowest sustained sound investigated up to the present time," said Dr. White.

Canadian Indian Field Crops

The total area under field crops on the Indian reserves in Canada in 1930 is returned as 201,185 acres. The acreages sown to the principal field crops were as follows: Wheat 42,420; oats, 35,894; barley, 7,839; rye, 2,949; peas, 746; beans, 748; buckwheat, 911; mixed grains, 1,028; corn for husking, 1,052; potatoes, 5,188; turnips, etc., 811; land for hay, 31,716; alfalfa, 1,731; grain hay, 1,411. The acreage under pasture was 39,839, and in fallow, 23,146.

W. N. O. 1880

Restless CHILDREN

CHILDREN will fret, often for no apparent reason. But there's always Castorol Harmless is the recipe on the wrapper, mild and bland as it tastes. But its gentle action soothes a youngster more surely than a more powerful medicine.

That's the beauty of this special children's remedy! It's given the tiniest infant—as often as there is need in cases of colic, diarrhea or similar disturbance. It is invaluable. A coated tongue cack for just a few drops to ward off constipation; so does any suggestion of bad breath. Whenever children don't eat well, don't rest well, or have any little upset, this pure vegetable preparation is usually all that's needed.

Empire Preference

Imperialism Means Strength, Civilization, Power and Unity

"Sapientia, to Canada, would mean subjection to the United States. We would become nought else but a back door to our cousins across the line, and we would have to pay in full for that protection," stated Sir Alfred Morine, K.C., K.C.M.G., former minister of justice, and leader of the government for Newfoundland, in an address on "Empire Preference" before the Lions Club of Toronto.

"Empire means strength, civilization, power, and unity, and we Canadians should not be mere nationalists. We ought to be strong imperialists."

"When we look at the United States in their present condition we cannot help but realize what a great position they would have held in the world if they had remained a part of the Great British Empire," said Sir Alfred.

"Let us not try to force our way into selling the Motherland our wheat; let us try to impress upon them the fact that what we offer is for the empire, not just for Canada," he stated in dealing with the wheat situation.

"Great Britain is terribly over-crowded, her natural resources are coming to an end; she needs electric power. What we need is men, population, and that would mean more business. Then why not impress upon Great Britain the fact that we need these things they need, and that we need their population; let them then bring industries to Canada."

"We don't like it because the Motherland buys Russian wheat, but why should we dictate to the Motherland?"

Dust Causes Asthma. Even a little speck too small to see will lead to agonies which no words can describe. The walls of the breathing tubes contract and it seems as if the very life must pass. From this condition Dr. J. D. Kellogg's Asthma Remedy brings the user to perfect rest. It relieves the passages and normal breathing is firmly established again. Hundreds of testimonials received annually prove its effectiveness.

World's Grain Exhibition

Work is now under way towards the erection of two new grain buildings for the World's Grain Exhibition and Conference at Regina in the summer of 1932. The buildings will have 48,000 square feet of space, being 640 feet long with two wings of 320 feet each.

For the Home Garden

A horticulturalist at the Ohio State University says that the ten annual flowers most satisfactory for the home garden are: zinnia, cosmos, marigold, scabiosa, snap-dragon, china aster, calceola, corn flower, blue salvia and larkspur.

Always keep Douglas' Egyptian Salve at hand, ready to bring immediate relief to burns, sores and sunburns, bleeding at once. Prevents blood poisoning. Splendid for sore throat and quinsy.

When a good idea comes into your mind, do not give it a seat; put it to work.

Raises British Bar Final

Achievement Of Captain Ian Fraser

Who Was Blinded In War
 The success in the Bar finals of Captain Ian Fraser, the blind chairman of St. Dunstan's, can only be appreciated fully by those who are themselves blind; but even we who have sight can understand something of the mental and moral qualities needed for such an achievement. Studying for the Bar involves endless consultation of references and the memorizing of masses of complicated facts. To undertake all this without eyesight shows a courage beyond the ordinary.

Doubtless, Captain Fraser's experience in Parliament proved valuable to him in his studies. He developed his memory there by studying subjects full of technicalities, and on several occasions he won applause from the House by his able exposition of statistics which many would have found frightening even with the aid of eyesight and notes.

He has not even allowed his affliction—caused by a war wound—to curtail his sporting activities. He won a sculling race not long ago, and has been several times skating at the Ice Club in Grosvenor Road. Only the lightest guidance from friends is necessary to aid his course through the crowd of other skaters. He takes part, too, in the sports meetings arranged by St. Dunstan's.—London Sunday Pictorial.

Recipes For This Week

(By Betty Hareley)

CRISP MOLASSES COOKIES

2½ cups special cake flour, sifted.
 1 teaspoon baking powder.
 1 teaspoon salt.
 2 teaspoons glycerine.
 1 cup molasses.
 ½ cup butter or other shortening.
 2 teaspoons soda.
 Sift flour once, measure, add baking powder, salt, and ginger, and sift again. Heat molasses, remove from fire, add shortening and soda. Add flour gradually. Chill. Roll over on a slightly floured board. Cut with floured cookie cutter. Bake in moderate oven (350 degrees Fahrenheit) 10 minutes. Makes 3½ dozen cookies.

APPLE SNOW

package raspberry-flavored gelatin.
 1 pint boiling water.
 1 teaspoon lemon juice.
 1 cup cold apple sauce, sweetened.
 1 egg white, stiffly beaten.
 Dissolve gelatin in boiling water. Chill. When slightly thickened, turn into sherbet glasses, filling them ¾ full. Chill until firm. Add lemon juice to apple sauce. Fold in egg white. Pile lightly on gelatin. Serve immediately. Serves 6.

Persian Balm—Invaluable to the whole family. To the mother, a flawless aid to loveliness. To the child a soothing, healing balm. And to the father, a splendid hair fixative and cooling shaving lotion. Persian Balm tones and refreshes the skin. Makes hands delightfully soft and white. Indispensable to dainty women. A little goes a long way and it is absorbed by the tissues, making the skin truly rose-leaved in texture.

Expect Large Sales

Season tickets for air travellers are being introduced in Europe with success. The Air Union is issuing them for use in England and nearby countries and expect a large sale this year. Passengers using them will save a third of the regular fares.

Stranger (at village station)—"Is this the 3:15 train?"

Porter—"We've nothin' so precise as that, sir. We just call it the afternoon train."

How To Lose 24 Pounds of Fat

At The Same Time Gain In Physical Vigor and Youthfulness and Swiftly Possess a Clear Skin and Vivacious Eyes that Sparkle with Health.

Here's the recipe that banishes fat and brings into bloom all the natural attractiveness that every woman possesses.

Every morning take one-half teaspoon of Kruschen Salts in a glass of hot water before breakfast. Be sure and do this every morning for "It's the daily dose that takes off the fat."—Don't miss a morning. Kruschen daily means that every particle of poisonous waste matter and harmful acids and gases are expelled from the system.

Modify your diet, and take gentle exercise. The stomach, liver, kidneys and bowels are tuned up, and the pure, fresh blood containing these salts is carried to every part of the body, and this is followed by "that Kruschen feeling" of energetic health and activity that is reflected in bright eyes, clear skin, cheerful vivacity and charming figure.

FREE TRIAL OFFER

If you have never tried Kruschen—try it now on credit. We will send you a most special "GIANT" package which makes it easy for you to move our claim for refund. Ask your druggist for the new "GIANT" 75c.

This consists of our regular 75c bottle together with a separate trial bottle—worth about one week. Open the trial bottle first, put it to test. Then, if you are convinced that Kruschen is the best, return the trial bottle. The trial bottle is still as good as new. Take it home. You need not return it. You get your 75c immediately and without question. What more can be said? Manufactured by Golda Hughes, Ltd., Manchester, Eng. (Established 1756). Importers: McMillan Bros., Ltd., Toronto.

New Electric Apparatus

Approach Of Human Being Sets Machine In Motion

A Lancashire man, Mr. Clifford Stanworth, has given, in London, England, a demonstration of an apparatus which is set in motion merely by the approach of a human being. Electric lights are switched on automatically as a person enters the room in which they are, and a shop window is flooded with light by anyone just looking in. The apparatus will act as a burglar alarm, ring a bell, or set an electric motor to work if anyone moves near to it.

Mr. Stanworth, who is twenty-four years of age, adjusted his invention to a large showcase fitted with ordinary electric lights. "Walk up to the case," he said. When a man approached within two feet of the lights were suddenly lighted. When he moved back the lights went out. It did not matter from whatever angle the show case was approached, as soon as any person was within two feet of it the lights went on. "It is extremely simple in system, like all inventions," said Mr. Stanworth. "The human body has electricity in it. This affects the wire as soon as one is within a certain range, which I can vary from a few inches to several yards. A very delicate instrument turns the switch."

The invention looks rather like a small portable wireless set. One claim is that it will halve the electric light bills for shops, because the lights will be on only when they are needed.

Grocer (making up the whole lot order for the week)—Jim, do we want any day-old eggs?

Clerk—No, sir. We have enough in the store room to last another six weeks.

Acts like a Flash

on Coughs & Colds

A speedy, safe, proven remedy for children and adults.

BUCKLEY'S
 Acts Like a Flash—A SURE SHOT REMEDY

Purity Flour Cakes Keep Fresh

A cake shown at Toronto Exhibition made from this Recipe kept fresh for five days in the heat and air without protection. Make it today—with Purity.

1 cup of white sugar, ¼ cup butter, cream together, ¼ beaten egg yolk, ¼ cup water (or milk), 1 egg white, mix 3 teaspoons baking powder in ½ cup Purity Flour, pinch salt, 1 teaspoon vanilla, beat egg white stiff and stir in mixture. Bake in moderate oven (375°) for 30 minutes.

Purity is a strong, rich flour made from the best wheat in the world. It is the only flour that gives you that "better flavor" which you want. But the best for bread.

Western Canada Flour Co., Limited, 308 Winnipeg, Calgary.

Look for our Company's name on the Purity Flour sack. It is your guarantee of quality from a responsible milling concern.

BRANCH LINES FOR NORTHERN ONTARIO URGED

Toronto, Ont.—Launching of an immediate development programme in northwestern Ontario, was advocated in the Ontario legislature by Major-General D. M. Hogarth (Cons., Port Arthur). Extensive railway building operations in that country, he said, would open up immense resources to development.

Two north and south lines of railway should be built, he stated, one from the head of the Lakes north to the Albany River, and one from Kenora north to the English River. They should then be connected by an east-to-west line and eventually linked up both with the Temiskaming and Northern Ontario Railway at Moose Factory, and with the Hudson Bay Railway at Churchill.

He urged the government to appoint a commission to investigate the possibilities of the northwestern part of the province with a view to building more railways. It would not matter whether the railways were built by private enterprise or under public ownership. The people of the districts wanted development and wanted communications.

Indication that government action might result from the suggestion came later in the session. George S. Henry, he said General Hogarth had made one of the most enlightened and constructive speeches on Northern Ontario he had heard, and stated the general's suggestion would receive the careful attention of the government.

For Embargo On Corn

Resolution Favoring Embargo Against U.S. Corn Introduced in Manitoba

Winnipeg, Man.—Indirect notice that the government would oppose a resolution favoring an embargo on United States corn entering Canada was given in the legislature. Hon. R. A. Hoy, Minister of Education, declared such a move would have no effect in bettering the price of barley in the Dominion, and said he failed to see what other purpose the plan would serve.

Debate on the import ban resolution, moved by A. R. Welch, Conservative member for Turin, continued, drew W. Sanford Evans, Independent Conservative, into mild support of the proposal.

Canada, said Mr. Hoy, imported between 12,000,000 and 14,000,000 bushels of corn annually for distillation, as a popular food and for livestock feeding. It could not be seriously suggested, he said, that an embargo on this United States product would put up the price of barley "a fraction of a cent."

If corn was not allowed to come into Canada, there would be a considerably larger market for Canadian barley, Mr. Evans thought. "Had the money which U.S. corn products cost been spent in Canada, it would have purchased the total quantity of Canadian barley carrying over from the last fiscal year," Mr. Evans asserted.

He would like to see Canadian barley used in the Canadian market, Mr. Evans said, and would favor a duty on U.S. corn.

Plans Polar Flight

Graf Zeppelin May Carry Scientists Over Polar Seas

New York.—The Graf Zeppelin will make a polar expedition of exploration in July, if Dr. Hugo Eckener succeeds in a plan to finance the project.

The genial commander of the big dirigible arrived here from Germany. The ship would proceed from Friedrichshafen to the Arctic by way of Leningrad, he said, and fly over Franz Josef Land and St. Nicholas Land with eight or nine scientists aboard.

Europe Has Mortgage Bank

Basel, Switzerland.—An international mortgage bank capitalized at \$5,000,000 was created for the purpose of extending long-term credits to European nations in need of such financing. It will work in close cooperation with the International Bank for settlement.

Air Mail Record

Toronto, Ont.—Shattering previous records by half an hour, a plane carrying the mails made the westbound 486-mile trip from Montreal to Toronto in two hours flat. It was piloted by V. J. "Shorby" Hutton.

W. N. U. 1530

Naval Parity For Italy

Has Gained Practical Parity With France in Naval Construction

Rome, Italy.—Italy gains practical parity of construction with France over the next five years under the terms of the British-Franco-Italian naval accord as disclosed unofficially here, and in 1936, when the accord expires, will be in a better position relative to France than she is today.

The principle of parity which broke up the London conference so far as Italy and France were concerned is not settled by the new accord but is postponed until 1938.

Meantime naval construction programmes are put on a practical level and so harmonized as to guarantee each country against surprise and to permit accurate check on annual programme laid down. The annual programmes are reduced from more than 40,000 tons to an average between 21,000 and 22,000.

Italy made some sacrifices, on terms of the agreement show, but she believes they will not affect the national security and that they are balanced by sacrifices on the part of the French.

The accord will give France, in 1936, a superiority of 220,000 tons but Italy discounts this, pointing out that 84,000 tons of that total will be obsolete while the Italian obsolete tonnage will be only 5,000.

Moreover, the French have certain types of ships which the Italians believe unnecessary to their navy.

A unique point, according to the terms disclosed recently, is that both countries are permitted to build two 23,000-ton cruisers. Another is the decided superiority the accord gives France in submarines, 81,900 tons as compared with 52,700 for Italy. Italy, however, receives parity in this category with Great Britain, the United States and Japan.

Fire Destroys Mail Planes

Fleet Of Seven 'Planes Lost In Disastrous Fire In Winnipeg

Winnipeg, Man.—A fleet of seven Western Canada Airways' planes and a Fairchild cabin machine, privately declared such a move would have no effect in bettering the price of barley in the Dominion, and said he failed to see what other purpose the plan would serve.

Flames broke out following an explosion in the hangar. Company officials, meeting with Fire Commissioner Edward McGrath, were unable to determine what had caused the blast.

More than a dozen mechanics and workers escaped from the building without injury, as the blaze quickly spread. No one was seriously injured, though minor injuries were reported having been suffered by fire-fighters. Three automobiles, standing inside the structure, also were destroyed.

Witnesses of the outbreak believed the blast occurred in the gasoline tank of one of the planes. Everyone in the building hastily fled as the resulting flames crept along the gas-soaked floor to other machines. When the first Winnipeg fire brigade arrived, eight planes were in flames, several standing just outside the hangar. Firemen were hindered from doing effective work by lack of water pressure.

Two small Laird mail planes, delivered only a short time ago, were among the flame-wrecked debris; and the pride of the company's fleet, a large tri-motored Fokker cabin machine, also was destroyed.

Eight hundred gallons of gasoline, stored outside the building, failed to explode, though the tanks broke into flames shortly after the blaze started.

Russian Trade

Thinks Canada Foolish In Refusing To Trade With Soviets

Montreal, Que.—For Canada to refuse to do business with the Soviets because Russians have their own idea of government is as illogical as refusing to listen to Italian grand opera because Mussolini is a dictator, in the view of A. M. Joseph Schubert, widely-known Labor party politician. By the Canadian embargo on Bolshevik goods, he said, Canada throws away a market of 162,000,000 people while Great Britain, the United States, and other countries feed on it.

Labor Leader To Visit Canada

London, Ont.—A. J. Cook, secretary of the powerful Miners' Federation of Great Britain, will be a visitor in Canada late this year or early in 1932, a letter from him to Raymond Smith of this city says.

Slight Drop Reported In Wheat Shipments

Movement Slowed Up For Last Week In February

Winnipeg, Man.—Movement of Canadian wheat overseas, maintained at a rate better than 4,000,000 bushels weekly since the first of the year, slowed up the last week in February, and at the same time the drop in the visible supply was less than average.

Exports for the week ending February 27, were given as 3,094,800 bushels in a report issued by E. A. Russell, statistician to the Dominion Board of Grain Commissioners.

Of the week's clearances, 1,054,149 bushels was shipped from Pacific ports in Canada.

Visible supply of Canadian wheat decreased during the week by 1,847,310 bushels and totalled 190,408,853 bushels.

MARKETING OF WHEAT TO BE INVESTIGATED

Ottawa, Ont.—While no official announcement has yet been made by the government in connection with a royal commission to investigate wheat marketing, it is understood that the government will likely institute such a body.

Belief in Ottawa is that the membership of the commission will comprise three persons, one representative of the farmers of the prairie provinces, a second representing the Winnipeg Grain Exchange, and a third acting for the Dominion Government.

It could not be confirmed that the government had sought the services of Sir Josiah Stamp, internationally famous English economist. Hon. Robert Weir, Minister of Agriculture, however, declared that he had been in touch with someone in England, the identity of the individual not being disclosed.

Circumstances surrounding the railway situation in England had caused the person indicated to forego the prospect of acting for the Dominion. It is believed, but not confirmed, that this individual was Sir Josiah Stamp.

One of the purposes of the commission would be to see whether the present system of trading in grain futures has, or has not, an injurious effect on the marketing of grain.

Farm Loans

Appraisers To Commence Work On Valuations On May First

Ottawa, Ont.—May 1st, has been fixed as the date on which appraisers this season will begin the work of valuation on applications for loans to the Farm Loan Board.

This decision was made at a meeting of the Farm Loan Board. Premier R. B. Bennett, who is also minister of finance, presided. Loans are made to applicants on farm lands and buildings at the rate of 6½ per cent. under the Farm Loan Act. When applications for loans are received by the board they are, if favorably looked upon, passed to appraisers for valuation.

This magnificent set of diamond and emerald earrings for pierced ears is being sent to England immediately as a presentation to Viscountess Willingdon from the women of Canada. Each earring consists of 44 diamonds and one emerald. Miss Mildred Bennett, sister of the prime minister of Canada, is convener of the Viscountess Willingdon presentation committee. In centre is hand-moulded platinum ring with large oriental pearl, the whole in a solid gold case, also included in presentation from women of Canada.

VISITS AMERICA

Grand Duke Alexander, of Russia, who is a claimant to the throne of the czars, has just arrived in America on a visit.

Brydges Wins Dog Derby

Russick Was Second and Emil St. Godard Finished Third

The Pas, Man.—Sturdy Earl Brydges was acclaimed king of Western Canada dog mushers for the second year in succession.

Brydges, battling an icy trail, almost bare of snow, and carrying four injured dogs on his sled, came home the winner of the Pas 20-mile non-stop derby, winning the premier prize of \$1,200 in cash and the Walter Goyne trophy. His time was 26 hours, 30 minutes, 20 seconds.

While far behind the record of "Shorty" Russick, established in 1924, when he finished in little more than 23 hours, Brydges' time was remarkable when the condition of the trail was taken into consideration.

Earl plodded across the finishing line covered with perspiration and nearly exhausted from his struggle with the treacherous northland trail. "Shorty" Russick was second, 16 minutes behind Brydges.

Emil St. Godard finished third, 28 hours, 4 minutes and 22 seconds.

Pioneer Settler Dead

James Harvey Saw Service In Rebellion Of 1865

Vernon, B.C.—James Harvey, aged 88, who was the first settler at what is now Indian Head, Sask., died at the home of his son, Dr. J. E. Harvey, here, following a prolonged illness. In the rebellion of 1865, Mr. Harvey had three transport teams working near North Battleford, Sask., and he himself saw service at the Battle of Batoche. He came to Kelowna, B.C., in 1906, and at one time was vice-president of the Okanagan Fruit and Land Company. He resided at Kelowna until his wife's death, at which time he came here.

British Estate Duties

London, England.—The British exchequer will benefit to the extent of nearly \$15,000,000 in the death duties of the estate of Sir David Yale, head of Andrew Yale and Company, and probably the wealthiest Briton in India, who died in 1928. The court of appeal ruled that Sir David was legally domiciled in the United Kingdom.

Making More Butter

Butter Supplies Now Almost Meeting Local Demand

Vancouver, B.C.—Increased attention that is being given to dairying on the prairies is revealed in the fact that butter supplies from the three prairie provinces are almost meeting Western Canadian requirements.

Attention is drawn to this new condition by the relatively small imports of butter from Australia and New Zealand at the present time.

Last week the "Aorangi" brought 725 boxes of butter to Vancouver from New Zealand, and 300 from Victoria, 3,642 from Australia for Vancouver, and 111 from the Fiji Islands, or a total of 4,779 boxes.

On February 28 of last year, the imports from the same sources were 18,515 boxes from New Zealand to Vancouver, and 1,495 from Australia, and 82 from the Fiji Islands, while Victoria had 3,200 from New Zealand, or a total of 23,292 boxes.

Vancouver dealers report that Alberta supplies are meeting the requirements of Vancouver, and that most of the butter imported since November is still in storage. Under an agreement between the importers and the Canadian Government none of the Australian butter can be sold at a price below 32 cents a pound; and the Alberta makes are being marketed just slightly under that figure.

SETTLEMENT OF INDIAN QUESTION PEACE TRIUMPH

New Delhi, India.—When India awoke on the morning of March 4, it found peace on its doorstep.

Overnight Mahatma Gandhi, with the vision of a prophet, had led his invisible sleeping multitudes from the precipice of war to the path of peace. He won the confidence of Viceroy Lord Irwin, who, less than a year ago, jailed the mystic agitator for challenging the authority of the British Empire, and an accord was reached which ended the year-old civil disobedience movement.

Nationalist circles naturally regard the truce as a triumph for Gandhi's doctrine of non-violence which, as Rabindranath Tagore said, introduced a new technique into international revolution.

While the terms of the agreement have not been officially published, it is understood they are as follows:

1. Nationalists will abandon civil resistance.
2. Indians along the coast will be given the right to manufacture their own salt and thus will not have to purchase it from the government monopoly.
3. Property of congress adherents which has been confiscated because of non-payment of taxes will be returned, with certain reservations.
4. Nationalists will be permitted to do picketing within the normal laws of the country and will be permitted to conduct boycotts so long as they do not aim specifically at British goods — in other words, if their idea is to promote local trade and industry.
5. Nationalists who were imprisoned for civil disobedience activities will be given amnesty and all government repressive measures will be withdrawn.
6. Nationalists drop their demand for an investigation into alleged police brutality.
7. The government won from them consent to work for qualified dominion status in a second round-table conference.

While the Nationalists have admittedly gained much by accepting the settlement, it is pointed out on the government side that Great Britain gains commensurate advantages.

The most important gain in this direction was the point wherein the Nationalists agreed to confine themselves at the next round-table conference to the specified scope of constitutional questions elucidated by the first round-table meeting in London, England.

This commits Gandhi to the principle of a federation of Indian responsibility, but with British safeguards covering finance, defence, foreign affairs, the position of minorities and the discharge of India's national debts.

The agreement was hailed with approval by British and moderate Indian newspapers. The Calcutta statement characterized it as just as decisive for the world as the Armistice in 1918, ending the first world war, and that the instrument has the possibility of solving two of the most menacing world problems today—the clash of color and the class economic struggle.

AWARD GIVEN TO U. S. IN CLAIM AGAINST CANADA

Washington, D.C.—Award of \$350,000 to the United States against Canada for damages in the State of Washington caused by fumes from the smelter of the Consolidated Mining and Smelting Company of Trail, British Columbia, was recommended by the International Joint Commission in an unanimous report made public by the two governments.

The question has been one of extensive diplomatic correspondence and protests by the United States for a number of years. It was referred to the International Joint Commission in 1923 for investigation and decision. The damages were recommended after an extensive investigation and hearings on both sides of the border.

The commission also recommended the company be required to proceed "as expeditiously as may be reasonably possible" with works to reduce the amount and concentration of sulphur fumes to a point where no damage would be caused by their drifting into the United States.

After approval of the report by the two governments, Canada would pay into the treasury the recommended damage for disbursement among claimants.

Secretary of States Stimson, in commenting on the report, expressed gratification it had been unanimous and praised the commission's efforts as proof of the value of joint arbitration methods to solve international problems.

Awarded McKee Trophy

Squadron Leader J. H. Tudhope Is Winner For 1930

Ottawa, Ont.—Squadron Leader J. H. Tudhope, M.C., of the Royal Canadian Air Force, stationed in Ottawa, has been awarded the McKee Trophy for 1930. It was announced here by Hon. Donald Sutherland, Minister of National Defence. The trophy is awarded annually to the Canadian flyer who renders the most meritorious service in the advancement of aviation.

During 1930, Squadron Leader Tudhope was the pioneer of all east and west air mail routes from the Atlantic to the Pacific. In the first four months of the year, he made a series of surveys of the Rocky Mountains, flying over 10,000 miles.

Squadron-Leader Tudhope joined the Royal Flying Corps in 1916, and served in France with No. 40 Squadron. He was granted the Military Cross and bar of gallantry. In 1920, Squadron-Leader Tudhope joined the Canadian Air Force and is now superintendent of airways in the civil aviation branch of the department of national defence.

National Highway

Falling Revenues Will Not Permit Of Much Work Being Done

Ottawa, Ont.—Federal finances will not permit an immediate large expenditure on the national highway was the conclusion reached by the department who waited on Prime Minister R. B. Bennett, after he drew their attention to the growing expenditure, decreasing revenues, and inevitable deficit, the Ottawa correspondent of the Mail and Empire says.

The delegation suggested alternative routes be provided such as via Winnipeg, Saskatoon, Edmonton and Vancouver in the north, and via Winnipeg, Regina, Calgary and Vancouver in the south.

Rich Mineral Deposits

Resources Of Northwest Territories Stressed At Mining Convention

Ottawa, Ont.—Canada's varied and immensely rich mineral deposits were discussed by the various speakers at the annual convention of the Canadian Institute of Mining and Metallurgy. The task of unfolding the mining map northward and the possibilities of rich resources in the Northwest Territories were stressed by J. P. Norris, Gordon C. Duncan and John Dryburgh.

Three speakers declared large mineral deposits exist in the Coronation Gulf region of the Arctic. Very little intensive work has been carried out, they said, but enough has been done to show the presence of extensive and valuable ore deposits.

More than 100,000 immigrants entered Argentina last year.

NOTES AND COMMENTS

A group of young people, and a few older ones, heard a most interesting and instructive address by Dr. Borden on "The History of Medicine." The valuable knowledge imparted to young people by addresses of this nature prompt the thought that professional and business men can serve the young people in an admirable manner, by giving vocational talks at frequent intervals. There may be no material reward to compensate for the time and effort in preparing addresses; but the appreciation shown is a source of satisfaction and pleasure, and a very useful service is rendered.

Older people at times complain of the rising generation assuming they know more than their parents. In mature judgment that only years of experience can develop, they may be lacking. But conditions generally would be very backward were it not that each generation knows more than that which preceded it. Remember the old proverb—"The child is father of the man." Think of what your child knows compared with your knowledge at his age. Progress demands that he should know more. His thoughts and ideals are far in advance of the horse and buggy days, and no wise or ambitious parent would wish it were otherwise.

Life is a grand opportunity for achievement. The majority are content to drift with the tide. Intensive thought and careful planning are too tedious. The men who achieve success in their chosen fields of professional or business endeavor possess those qualities of concentration and ability to envision the future which enable them to stand out from the great army of the mediocre. Theirs is not the line of least resistance, or accepting the dictum of Fate. They challenge Fate and turn seeming disaster into victory.

How many would rather while away idle hours in pleasure, than trying to improve their general knowledge and train for more important positions?

To win business you have to fight for it every day. You will not get all you aim for, but more will be secured than by waiting for something to happen. A sheriff's sale may happen if you wait, or you may die of inaction.

Hockey in the Pass towns this season has furnished a few thrills, a lot of laughs, and to Blairmore many "regrets." The "home-brews" of Coleman stepped out on the ice and gave their rivals a few hard jolts, which were climaxed by the Lacombe-Blairmore rout, in which Coleman fans played a conspicuous part, judging from the publicity accorded them. However, the strife is over; the battle lost, as far as the Pass is concerned, and we will await with keen anticipation the opening of next season and Coleman's attempts to win the provincial championship. To the Canadians we all can say—well done! They have no reason to shed bitter tears, as their rivals appear to be doing.

The Cranbrook Courier remarks that some people's attitude would put the town into the hands of a receiver instead of help it progress. Don't worry, Cranbrook; there are others!

Many who leave footprints on the sands of time only advertise the makers of their rubber heels.—Ex.

Here and There

White Leghorn hen "No Urone 58" from Port Kells, B.C., laid 357 eggs in 165 days, qualifying her as champion egg layer. The eggs weighed 52 pounds, just ten times her own weight.

In the past fiscal year in Nova Scotia there were 131 companies incorporated with total capitalization of \$5,367,000, an increase of 13 new companies over the previous year.

Rt. Hon. R. B. Bennett, Prime Minister of Canada, and a graduate of Dalhousie University of 1893, was recently presented with a leather-bound script conveying recognition and regard of nineteen classmates of the same year.

Theodore H. Kipp, chairman of the Industrial Development Board of Manitoba, reports that since the inception of the Board, Manitoba's industrial payroll has been increased from \$18,000,000 to \$25,000,000.

Miss Margaret Stevenson, of Edmonton, has succeeded to the crown of the United States Winter Carnival, following Miss Doris Parkes, of Vancouver, last year's queen. The election was the closing feature of a very successful meet.

W. E. Brissenden, of Montreal, has been appointed Development Engineer, Department of Development, Canadian Pacific Railway. He succeeds G. M. Hutt who was recently promoted to Assistant Director of Development, with headquarters in Winnipeg.

The 42,500-ton Empress of Britain which is scheduled to sail on her maiden voyage to Quebec, May 28, is the largest vessel built in Great Britain since pre-war days and the largest ship plying between British Empire ports. She will also be the largest vessel ever to make a world cruise.

Total increase in railway taxes during the 38 years from 1890 to 1928 in the United States was from \$1 million to \$21 million dollars, says Dr. Parmelee, Director, Bureau of Railway Economics. This, he asserts, has had an unfavorable effect both on industries and individuals.

The annual University of Montreal year across Canada which has been a feature of the educational life of the University for the last six years, will be extended to include Alaska and the Yukon Territories for the season of 1931, according to Canadian Pacific Railway announcement recently.

Shipped by Canadian Pacific across Canada 27 head of purebred Jersey cattle, four pigs, four mountain goats and sheep were swung aboard the freighter Wai-hemo for New Zealand recently. Captain Flynn, skipper of this new Noah's Ark, wasn't worrying. He said he had handled tigers as well as seamen and stokers in his time.

J. H. Evans, Deputy Minister of Agriculture for Manitoba, states that, "In no branch of farm production in Manitoba has the price been so well maintained or the volume of business increased so much as in honey. Manitoba produced well over one-third of the total honey crop in Canada, the quality of which was unexcelled; and at the present rate of increase Manitoba will be the largest producer in the Dominion next year." 708

Miss Jean Alexander, of the Calgary Herald staff, spent Tuesday here assembling data on women's organizations for a feature article in The Herald. Farnie, Blairmore and Pincher Creek were also visited. Several articles have already been published and are very interesting. They are usually published in the Saturday edition.

TO OUR FRIENDS

The Journal staff thanks those who have kindly placed orders with them for printing and advertising. During the past year and a half it has shared the difficulties in common with other lines of business, but faith in Coleman and the support of loyal customers has enabled us to carry on, even if we have felt the pinch occasioned by lack of general work. Co-operation and loyal support helps many over a time of difficulty, and we appreciate it. The same applies to our many subscribers.

**When in Need of
Printing**

—Remember that orders left with your home town printer will serve to pay wages of workmen who in turn spend this money with local business houses, thus serving to maintain that round of business which is necessary in order we may all flourish and prosper.

Churchill Townsite Opening May Be Necessarily Delayed Until August Of This Year

Not until August—if at all this season—will Churchill, Manitoba's new Bay airport, be opened to the public. Officials of the Manitoba Government, masters of the townsite, are seeking to surmount problems which threaten to delay the town opening until August, a time so late it may be deemed better to wait until next season.

Clamoring hundreds ask permission to "get in on the ground floor" this summer at the rock-girt terminal of the Dominion Government's Hudson's Bay Railway. Business men, adventurers, pioneers who tend irresistibly toward the north—these are the folk who are eager to be residents at Churchill when the Britain-bound freighters first steam whet-bow across the Bay.

Opening of the town to the public will terminate the "engineers' paradise," which has existed since old Mike O'Shea's extra gait laid first steel into Churchill in the howling March gale of two years ago. Entry into Churchill has been allowed only on special permit, and workers engaged in track-laying, harbor building and elevator construction have been under strict surveillance of their employers.

Beyond the establishment of a trio of banks and the operation of a canvas-walled movie show blown down by the Bay gates, commerce has made virtually no appearance at the West's northern harbor. Food is served at the camp messes, sleeping quarters are provided, and work is there to be done only bare necessities may be obtained by purchase, so that most workmen finish a season at Churchill with a real "stake."

Promise of export of shipping at Churchill this fall, if only for a few weeks in late September and October, has occasioned a new rush of applications to set up poolrooms, barber shops, restaurants and general stores at Churchill. The Dominion Government has pledged its effort to ship 750,000 bushels of wheat—three good-sized boat cargoes—this fall. Plans from Saskatchewan still ask shipments of as much as 5,000,000 bushels of wheat.

In planning a decision on the townsite opening, the Manitoba Government is confronted with the most concerned with the question of whether adequate preparations for an ingress of major proportions could be made by the beginning of August. It is believed unlikely to permit settlement at a late date this season, lest new residents be caught unprepared for the rigors of the sub-Arctic winter. Postponement until next spring may be considered advisable.

Fire protection regulations rank among the most important matters to be settled in connection with the site proper especially if the water supply is to be limited; yet officials realize that too drastic regulations will meet with pronounced opposition from the rough-and-ready pioneer type certain to predominate among early Churchill residents.

Indications are that fireproof, or at least semi-fireproof, buildings will be demanded within the limits of a certain portion of the townsite proper, which will be located on the rocky point forming the south side of the Churchill river's mouth. Possibilities that squatters may set up their two or three board "shacks" beyond the restricted area are foreseen, regretted—but not immediately disposed of.

Present plans of the Dominion Government are to bring water from the Rosabelle Lake area, three miles south of the townsite, by means of a raised aqueduct in-

culated against wintry cold.

Engineers who seek even greater assurance of permanent adequacy, favor piping water from above tide-water on Churchill River, about seven miles upstream from the town. Technical opinion differs as to which is the better plan.

Use of pumping equipment in connection with pipes from above tide-water, some engineers claim, would provide unlimited water supply and reduce fire hazard. Under this system, lines might be laid in the river bed, out of the reach of frost, virtually an ever-present threat in the Churchill area.

Drainage of the townsite, to be laid out within a few hundred yards of the towering 2,500,000-bushel grain elevator now under construction, is looked on at least partially as a problem. Water, seeping down from the ground surface, reaches the permanent frost line and is unable to penetrate further. It gathers along this level and if a rise in the frozen substratum is encountered, the water comes to the surface, resulting in a permanently marshy area.

Beyond these major problems, the Manitoba Government must yet locate its main service plant, mark out the streets and avenues for the port town of '38, designate the location of the more important buildings to be located, and so on. Tentative decisions have been reached on most of the questions, but the uncertainty still remains as to whether Churchill will be a first-class city in time to settle them comfortably for the cold weather.

Puts In Eight-Hour Day

Frenchwomen 101 Years Old Work As Stitcher In Bookbinding

In these times of general business depression and unemployment the great fear of Helene Bonnet, who works as a stitcher in a bookbinding shop in Paris, was that she might lose her job. She knows how hard it is to find work when you reach "a certain age."

It happens that Helene Bonnet has reached "a certain age." As a matter of fact, she is 101 years old, which does not prevent her from putting in an eight-hour day with the best of them. But she would never consent to tell her age. Neighbors and fellow workers imagine that she still entertained matrimonial hopes. They were hopelessly wrong. Helene feared the loss of her job.

Put To New Use

Playing Cards Are Now Being Made Of Aluminum

Aluminum is being used more and more for all sorts of purposes. It is being used for cables that carry electricity across country from power stations, in place of copper, and its latest use is in the making of playing cards.

These have the usual colored faces and backs and look and feel like ordinary cards, except that they are a little heavier. In the open air they will not blow away as do those made of cardboard, and if they become soiled they can easily be washed, which is a great advantage.

It is interesting to remember that aluminum, although one of the commonest of all metals, being found in 1929, was only discovered so recently as 1897 by Frederick Woehler, a German.

Potato Harvest Of 1930

Average Yield Shown At 85.6 Cwt.

Per Acre Of Land

The preliminary estimate of the total yield of potatoes in Canada, in 1930, is 49,150,000 cwt. from 574,500 acres, or 85.6 cwt. per acre, as compared with 39,830,000 cwt. from 543,727 acres, or 73.3 cwt. per acre in 1929, and 46,000,000 cwt. from 550,707 acres, or 83.5 cwt. per acre, the average for the five years 1924-28. By provinces, the average yields in cwt. per acre are, in order, as follows: New Brunswick, 115.7; Nova Scotia, 118.0; Prince Edward Island, 105.0; British Columbia, 92.0; Alberta, 86.7; Manitoba, 85.7; Ontario, 78.4; Quebec, 78.0; Saskatchewan, 63.4.

The United States supplies the world with practically all its rubber erasers and rubber bands.

The gorilla is a more redoubtable and sober animal than the playful chimpanzee.

TWO EXPRESS LITERALS

Here they are, "Sandy" and "Earl," old friends of 18 years' standing, although Earl has had 18 years and Sandy Campbell, 39 years with the Canadian Pacific Express Company. His years of steady service in picking up and delivering goods for the company has given Earl such a knowledge of his route, which covers the area of downtown Toronto around Bay and Adelaide Streets, that he trots up and down the streets without any help Sandy gives him no orders for he knows his route as well as his driver. Earl is shown here mutely asking Sandy to carry on with his next delivery.

Cooks Travel With Him

The Maharajah Jagannath Prasad Sinha of Deo, took his own cooks and cooking utensils with him when he went to Berlin. His cooks were allotted a special part of the kitchen in the Central Hotel. The cooks are said to have brought with them 100 different varieties of spices, roots and herbs, most of which are unknown in Europe.

Ice cream, packed in dry ice, recently made a 12-day journey from Seattle to Berlin.

Seeress Predicts War

War will hit the world again this year, with the Communists losing power in Russia, Spain having another republican uprising, and France escaping all military turmoil, according to Mme. Deur Thebes, a fortune teller who is endeavoring to take the place of the famous Mme. de Thebes. Europe, as a whole, will be in a turmoil, she predicts.

Rising waters of lakes in Scotland are driving wild animals from their old haunts into the open.

FASHION

No. 139—Sports Frock. This style is designed in sizes 36, 38, 40, 42, 44, 46 and 48 inches bust measure. Size 36 requires 3 1/2 yards of 35-inch material with 1/2 yard of 35-inch contrasting.

No. 187—Bloomer Dress. This style is designed in sizes 2, 4, 6 and 8 years. Size 4 requires 2 1/2 yards of 39-inch material with 1/2 yard of 32-inch contrasting.

No. 187—Smart Sophistication. This style is designed in sizes 6, 8, 10 and 12 years. Size 8 requires 2 1/2 yards of 39-inch material for dress and hat with 1 1/2 yards of 35-inch material for blouse and 1/2 yard of 32-inch contrasting.

No. 139—Cowl Neckline. This style is designed in sizes 16, 18, 20 years, 36, 38, 40 and 42 inches bust measure. Size 36 requires 8 1/2 yards of 39-inch material.

No. 208—Peplum Model. This style is designed in sizes 14, 16, 18, 20 years, 36, 38 and 40 inches bust measure. Size 16 requires 4 1/2 yards of 39-inch material. Send 25 cents (in stamp or coin) to Fashion Bureau. Write carefully and plainly your name and full address, the number of the pattern and the size you want.

More Balanced Production Of Livestock In Canada Is Need Of Agriculture

Dairy Congress

World's Dairy Congress Will Be Held In Denmark This Year

At the World's Dairy Congress, staged for the wonderful Christiansborg Castle, Copenhagen, July 14 to 17 of this year, Canada will be officially represented by Dr. J. A. Ruddick, Dominion Dairy Commissioner, who will speak on "The Trend of the Dairying Industry and Trade in Canada."

Denmark is seizing the opportunity of advertising her staple products, butter and bacon, by sending out great quantities of very attractive literature, profusely illustrated with the beauty spots of the country, but every piece carrying the tale of the wonderful production of eggs, bacon, butter, cheese and the slogan "No Farm Relief Needed in Denmark." Very cheap excursions are being offered by vessels plying to Denmark and from Kink Christian, under whose direct patronage the congress is held, to the humblest of his subjects, the country is laying itself out to give the visitors a good time.

Opportunities In Sheep-Raising

Imports Of Mutton And Wool Exceed Production, Growers Are Told

With Canada consuming more mutton and using more wool than it produces, there is much opportunity for development. G. E. O'Brien, of the Co-Operative Wool Growers' Association, told the Ontario Sheep Breeders' Association at its annual meeting in Toronto. Mr. O'Brien stated that in the past 15 years lambs had increased from 2,000,000 to 3,500,000. Canada consumed 57,000,000 pounds more mutton than she produced, Dr. J. H. Grisdale, Canada's Deputy Minister of Agriculture, told the association. Lambs brought in for food purposes were inferior to Canadian lambs, he stated, and foresaw some changes in regulations governing imports of sheep and wool products.

Russia's Wheat

Program Provides For Increasing Production From Year To Year

Russia's wheat crop in 1930 provided an exportable surplus of about a hundred million bushels, but next year, according to the Fish Report, it is planned to make that surplus two hundred millions, even though Russians go hungry. If it succeeds there will be practically no European market for the United States, as the American farmer cannot compete with grain raised on confiscated land by labor receiving an average of fourteen cents a day. But that is not all. The Russian Government's programme is to drive its farmers to still heavier wheat production, and it hopes by the fall of 1932 to bring its surplus up to five hundred millions—Duluth Herald.

Dairy Industry In Canada

Domestic Consumption Of Dairy Products Rapidly Increasing

In a review of the dairy industry in Canada, Dr. J. A. Ruddick, Dominion Dairy Commissioner, said that since 1921 domestic consumption of dairy products in Canada had increased to the extent of 154,529,347 pounds of butter fat equivalent. This is made up of an increase of 72,707,604 pounds in butter; 12,657,919 pounds in cheese; 2,541,361,024 pounds in milk, and 1,875,322 gallons in ice cream.

Easily Fazed

A man who had great difficulty in spelling words that had "el" and "le" in them mentioned the matter to a friend.

"Oh," said the friend, "I have a splendid remedy for that. It's infallible, too. You need it for years and never been let down yet."

The first man expressed his delight and interest, then waited for enlightenment.

"The rule is this," the friend declared: "Write your 'n' and 'm' exactly alike and be sure and put your dot exactly between the pair of them."

Trade With Russia

Canada's total imports directly from Russia last year were \$1,964,000, of which—just slightly over \$64,000 was the value of coal brought in from Russia. Canada's imports the previous year totalled \$910,000. Exports to Russia from Canada in 1930 were \$1,680,000, and the year before, \$3,395,000.

For several years farmers have been urged by those concerned in marketing farm products to take advantage of the many and varied fields open to them. In the best of that advice there was always the expressed desire to see more balanced production rather than the specialization in some staple to the neglect of others. The necessity of balancing production has been abundantly shown by the experience of the past months. Concentration on the export of grain, with a consequent framing of all policy in that direction, has been found to be unwise. When the inevitable day of low grain prices arrived there were not sufficient alternative sources of revenue.

If the advantage of having an alternative market for coarse grains, for instance, had been kept steadily in mind a policy would have been framed that would have favored cheap and efficient distribution of feed to livestock farmers in this country. If such conditions had been fostered, farmers in consequence would have had a volume of hogs during 1929 and 1930, which would have made very good profits indeed in the export bacon market and have had reasonable numbers of pigs to take care of a large part of the present crop of coarse grains, which is almost unsalable in the export markets. The export price for bacon is now very low but much of the grain that for some time has filled our elevators might have been marketed in the form of coarse grains, which is still in the meantime European countries have fostered hog production and with cheap feeds have reaped big profits for the past couple of years. Now there is a glut of this product on the British market. But for extremely cheap feeds there may be no set up of production. It seems certain that the cream of profit in bacon for this period has been skimmed by the countries that had their production organized when prices were high.

Balanced production calls for an increase in livestock and livestock products in Canada, and the shaping of policies to that end. It does not, however, contemplate such things as wholesale rushes into hogs for the mere purpose of testing up unsalable grain. When the grain situation straightens out export of grain will again form a very big part of Canada's business. But never again should it be permitted to engross attention to the neglect of an increasing volume of livestock products.

Steadiness in volume of supply is of equal importance to the well being of the Canadian hog and bacon industry as quality of product. History shows that the most disturbing element in production is that those now rushing into hogs will not "stick" if low prices for their first glut of product should give a temporary set-back and discouragement. A rash out of hogs next fall will again set up the old cycle of gluts and shortages on perhaps a worse scale than ever.

Immediate prospects in the Canadian hog industry emphasize more than ever the need for more balanced production, less "putting of all eggs into one basket" in general, and less flocking into any one line that offers tempting prices merely because of conditions brought about by shortage rather than by the inherent value of the article. No sound industry can be built up if the bulk of producers quit when prices happen to fall and then come rushing back when prices rise in a way to create a glut and thereby again to disorganize the market. Such a policy hurts those who stay in steadily and gives no real profit to the "in and out."

The imperative necessity for a healthy agriculture in Canada now is better regulated and more balanced production of all livestock, so that steady markets may be developed for the products which livestock yield.

"An alarm clock in the hen house"

"Yes, the young cock woke up the neighbors early in the morning. Now I hope things will be better."—Doris Barber, Berlin.

"I am sorry I was not at the opening of your restaurant."

"You flatter me, sir."

"Yes, the food may have been fresher than it is today."—Hummel, Hamburg.

WORLD HAPPENINGS BRIEFLY TOLD

Canadian Indians, in 1929, numbered 108,012, the Department of Indian Affairs reports. One-half are listed as Roman Catholics.

The council of London, Ontario, has decided to support the Winnipeg resolution favoring the setting aside of the day after Christmas as a holiday.

More than \$35,000,000 was spent by the British Government in the last fiscal year to help finance projects for providing work for the unemployed.

More definite protection for the agricultural debtor from foreclosure was sought by the board of the United Farmers of Canada, in session recently at Saskatoon.

The Reverend John Hydeok, 61, and his wife, 52, Nottingham, England, celebrated their silver wedding anniversary by passing the final tests for air pilot certificates after 18 months of training.

February, 1931, will go down as the lowest February for the collections of national revenue in Montreal since the war. Only one other month, January, 1925, had lower collections than did February of this year.

The "rock pile" will be restored to all Ontario reformatories and falls in the belief that reformation is best accomplished by hard and productive labor. Prisoners will be provided with goggles to prevent the danger of eye-injury.

COVETS CAMPBELL'S RECORD

Norman "Wizzard" Smith, Australian speed king, who will shortly make an assault upon Capt. Malcolm Campbell's world land speed record of 245 miles an hour, driving a car now under construction in Sydney, and with speed tests in New Zealand.

Many Divorces In Canada

Eight Hundred and Seventy-Five Divorces Granted in Canada in Year 1930

A total of 875 divorces was granted in Canada during 1930, according to a return issued by the Dominion Bureau of Statistics. Of this number 247 were granted by the Dominion Parliament, and comprised marriage dissolutions in Ontario and Quebec. The remainder were decreed by the various courts of the other six provinces involved. No divorces were granted in Prince Edward Island, which province has had only one marriage dissolved in that fashion since confederation.

British Columbia headed the list for 1930 divorces, the figures in the Pacific Coast province being 255. Ontario had 207, Alberta, 151; Manitoba, 114; Saskatchewan, 62; Quebec, 40; New Brunswick, 27, and Nova Scotia, 19. This total of 875 was 59 more than the previous year, and was the largest in the country's history. Since 1913, a total of 7,766 divorces have been granted in the Dominion.

Manitoba Mining Industry

Over \$62,000,000 Is Now Invested In This Industry

Hon. D. G. McKenzie, Minister of the Department of Natural Resources for the Province of Manitoba, reports a twenty per cent. increase in Manitoba's miners' production for 1929 over the previous year, the total production amounting in value to \$5,423,825.

Capital invested in the Manitoba mining industry is now computed to be over \$62,000,000.

The year 1930 was the best yet in the mining history of Manitoba in the matter of advances towards mineral production. Mining expenditures that year were 15 per cent. more than the previous year's figure of \$12,500,000.

Railways and Air Routes

Joint Rail and Air Services May Be Future Development

Air developments, more particularly as they affect the operations of a large transcontinental transport system, are being closely watched by the Canadian Pacific Railway with a view to the inauguration of joint services, when the time is considered opportune. It was stated recently by E. W. Beatty, president of the Canadian Pacific Railway.

"If the development in air service, which is progressing satisfactorily, demands joint rail and air services, they will undoubtedly be provided by the Canadian railways," said Mr. Beatty.

Slump In Watch Industry

The watch-making crisis in Switzerland appears to have been reached. July, 1930, was the poorest month in years, only 114,000 cases being turned out. But the heaviest decline has been in pocket watches and automobile clocks. The clocks, most of which in former years were exported to the United States, have nearly disappeared from the market.

An archaeologist states that until eighty years ago, almost all the known remains of ancient Babylon and Nineveh were in a little glass case in the British Museum.

It is predicted that cornstarch may eventually find their way into the manufacture of noiseless gears, insulating material, and similar products.

Poland's population has just been estimated at nearly 30,000,000.

NO MORE ECZEMA

Itching Ends Right Away
"I have been suffering from eczema for years. I tried everything, but nothing helped. I was told to try 'No More Eczema' and it worked. I am now free of the itching and the skin is clear." — John Smith.

Palladium Medal

Wellston Medal Of Geological Society Of London, Is Made From Rare Metal Mined In Canada

The Geological Society of London's 101st Wellston Medal was recently presented at Burlington House, London, England, to Dr. Arthur William Rogers, director of the Geological Survey of South Africa, according to word received by the International Nickel Company, of Canada, Ltd.

Awarded annually by the Society with the object of promoting research concerning the mineral structure of the earth, the medal this year is unique in that it is made of palladium which is mined in Canada, instead of such other precious metals as gold or silver. Palladium, which is a non-tarnishable precious metal of the platinum group closely resembling silver in color, was discovered by Dr. William Hyde Wollaston, F.R.S., F.G.S., in 1803.

The metal was presented to the Society by the Mond Nickel Company, Ltd., who are important producers of that and other metals of the platinum group. In a speech at the presentation dinner, Mr. D. O. Evans, delegate director of the Mond Nickel Company, said remarkable progress had been made in the world's production of palladium since Wollaston's days.

His feet and hands, he said, had been derived from the company's vast resources in the nickel-copper ore regions of Ontario. These Canadian ores, he said, were worked primarily for their nickel content, palladium, platinum and other metals being a by-product. He said the International Nickel Company, of Canada, Ltd., of which Mond is a subsidiary, could now produce upwards of 100,000 ounces of palladium a year, which would represent a substantial proportion of the world's potential consumption.

New Radio Treatment

Professor Stiebeck, of the Vienna polytechnic, recently has been using three meter waves from a one-half kilowatt radio transmitter for treatment of inflammation of the lungs, such as is associated with influenza; cases of cancer and internal suppuration. He claims to have had encouraging success.

Smallest Working Locomotive

What is claimed to be the smallest working locomotive of the world, made by J. J. Langridge, of Riverside, Isleworth, Middlesex, is exhibited at the Wimbledon and District seventh annual exhibition at Wimbledon, England. The model, which runs by electricity, can be almost entirely covered by a postage stamp.

SUNDAY SCHOOL LESSON

MARCH 15

JESUS AMONG FRIENDS AND FOES

Golden Text: "Ye are my friends, if ye do the things which I command you."—John 15:14.
Lesson: Luke 10:38 to 11:54.
Devotional Reading: Psalm 86:1-7.

Explanations and Comments

Martha's and Mary's Friendship For Jesus, 10:34-42.—Jesus was a frequent Guest at Bethany in the home of Lazarus, Martha and Mary. On one occasion Mary was sitting at His feet and listening eagerly to His words, when Martha, troubled about the preparation of the meal, came and said impatiently to Jesus, "Lord, dost Thou not care that my sister did leave me to serve alone? bid her therefore that she help me." Can she for her, and then gently chided her, "thou art anxious and troubled about many things; but one thing is needful." Moffatt's translation reads: "one dish alone is necessary." Both sisters were wont to sit at Jesus' feet (note the word "alone," verse 39); and according to Moffatt's translation we may assume that both helped to prepare the meal, but Mary returned, thinking the fare prepared adequate. Martha, on the other hand, wished to serve a more pretentious dinner—one of many dishes—in order better to honor the Lord. The whole point of Jesus' words to her, then, was to warn her against herself. He did not wish His visit to turn her into a drudge. He desired her also to love Him and learn.

"If you had seen Martha you would frequently have said of her doing, 'She would do more if she did less.' The woman was overworked. The busiest mother would do amazingly well for herself if she will withdraw from the ardent demands of the domestic circle and have ten minutes with her Lord. But I have so much to do! I know all about it, but you will do them better for the apparent waste. Deep communion gives us the power of doing more with less. The soul's calm assurance of God. The nerves are soothed and calmed and His feet are still."—J. H. Jowett.

"For Mary hath chosen the good part which shall not be taken away from her." "Not yours in bustling about, Martha, but hers is the 'good part' of mind-peace not to My body but to My spirit's need for sympathy and understanding. It will not be taken from her now by My bidding her to help you, and it is of such character that she will never lose it." Mary's gift was not so much sympathy, the power to detect in their whom she met what was the main thing to be sympathized with."—George Matheson.

"Speak low to me, my Saviour, low and sweet From out the hallelujahs, sweet and low. Lest I should fear and fall, and miss Thee so Who are not missed by any that entreat— Speak to me as to Mary at Thy feet."—Mrs. Browning.

Reindeer in Alaska now number more than 1,000,000 head.

Has Freak Eyesight

Objects At Close Range Magnified

One Hundred Times The eyes of Alva Mason, 25, an electrician at Minot, Me., are so focussed that objects within a distance of eight inches are magnified more than 100 times their actual proportions. For ordinary work Mason has to use glasses that do-magnify and another person looking through these spectacles might just so well be gazing through the wrong end of a telescope.

Objects more than eight inches from Mason's naked eyes appear blurred, but at a closer range he can even distinguish phonograph records by the difference in impressions made in the discs. Removing his glasses, he can point with unfailing accuracy to the recorded anvil strokes in the "Anvil Chorus" from "Il Trovatore." Mason does not have to hear a record to determine whether or not a song was sung in a staccato or crooning manner. The sound grooves appear to him as the track made by dragging a finger through soft mud seems to the ordinary sighted eye. Fosses of the skin and the infinitesimal holes in newspaper are quite apparent to Mason when he discards his glasses necessary for the greater part of his work.

Size Of Bee Colony

An interesting experiment has been under way for the past five years to determine the approximate field force of a normal colony of bees. During this period, thirteen calculations have been made by officers of the Department of Agriculture, the figures varying from 22,187 to 39,687, but only from two occasions did the number fall below 30,000. It is reckoned that approximately 5,000 bees weigh a pound.

Fruit acids, paradoxically, counteract the acid effects of certain foods in the diet.

Personal and Local

A birthday party for the twin children of Mr and Mrs J. Naylor was held at their home last Thursday evening, at which a number of young girls attended.

It may surprise many to learn that a high class saxophone costs \$650 or more. Most of the music one hears from them makes him feel they are not worth more than ten cents—or less.

A meeting was held last evening in the K. of P. hall under the auspices of the Insurance Bill Campaign Committee, and was addressed by R. Sudworth, J. Stoklak, T. Hughes and M. Gilmore.

See "My Irish Rose" in the Opera house next Thursday night, when a talented company of young people will present this three act play under the auspices of Holy Ghost church, being the annual St. Patrick's entertainment.

The school board met on Tuesday night, when a delegation of ministers discussed technical education in Coleman schools. The dental contract was also under discussion. These matters are to be further discussed.

Where is this passage found: "A horse, a horse, my kingdom for a horse!" The first bright boy or girl who sends in the reply will be given a year's subscription to The Journal, or if already a paid-up subscriber, it will be renewed for a year.

A letter was received by Arthur Reynolds from J. C. Cox, who since he left here, after visiting relatives in Edmonton, went south to Chicago, where he spent some days with a former Colemanite, Harry Wilton Clark. He is now enjoying a trip to Bermuda, and will later proceed home to Wales. It is probable he will return to Coleman about the end of May for a brief visit.

The town council met on Friday, Mayor Moores, Councillors Jackson, Rushton, Pattinson and Jones present. The 1930 tax roll was adopted for this year, and Jas. Ford appointed assessor. The hospital board interviewed the council with respect to securing a piece of land west of the hospital for garden purposes. Decision will be made at a later date.

A very pleasant evening was spent by all who attended the whist drive and dance held in the K. of P. hall on Saturday. The prize winners were Mrs. Jas. Cousins, Mrs. A. McCulloch, Jack McDonald and John Denholm. Bill Picard and his night hawks proved quite a success, and the attendance was increased by a number of young people from Blairmore.

If a fireman on a locomotive were to shovel in all the coal it would hold, then wait till it was burned up before he shovelled in some more, the engine would cease to run, for steady steam pressure would not be maintained. So with advertising. The result getters are those who maintain the steady effort, day after day and week after week. Spasmodic efforts bring only spasmodic benefit. It applies to everything in life's activities.

Labor cost only for setting a column of type by typesetting machine is \$4.00. Added to that somebody has to be paid for gathering the news, the paper on which it is printed and the press work, mailing, cost of overhead, office and other sundry charges must be paid, so that from a selling standpoint it is worth in the average country weekly at least \$8.00 a column. Taking these figures into consideration, it will readily be seen that the giving of free publicity costs a newspaper real money.

Use stamped and printed envelopes. 2c stamped envelopes with name and address printed in corner or on flap of envelope, \$3.00 for 100. Not stamped \$1.00 for 100 printed or box of 500 No. 8 super quality, printed, \$4.00, 1,000 for \$6.75. No. 7 envelopes \$5.00 per 1,000, printed.
